

ABHAY OJHA

✉ techmaster050718@gmail.com | 📞 +91 9580239104 | 🐙 GitHub | 💼 LinkedIn | 🌐 Portfolio

Professional Summary

Software Engineer specializing in Python backend development, REST APIs, and scalable cloud infrastructure. Experienced in building applications with FastAPI, Django, and PostgreSQL while automating deployments using Docker, Kubernetes, Terraform, and AWS. Proficient in designing CI/CD pipelines via GitHub Actions and integrating AI-powered solutions to deliver robust, production-ready software systems.

Technical Skills

Programming Languages: Python, Go, JavaScript, TypeScript, Java, SQL, Dart

Backend: FastAPI, Django, Node.js, Express.js, REST APIs, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB, SQLite, Firebase, Supabase, Prisma ORM

Cloud & DevOps: Docker, Docker Compose, Kubernetes, Terraform, AWS (EC2, IAM, S3), Azure, GitHub Actions, GitLab CI/CD, Jenkins, Cloudflare, Nginx

Frontend: HTML, CSS, JavaScript, React, Next.js, Tailwind CSS

Version Control: Git, GitHub, GitLab, Bitbucket

Operating Systems: Linux (Ubuntu, Debian, Kali), Windows, macOS, Bash/Shell Scripting

Projects

FluentMind | [Live Demo](#) | [GitHub](#)

Next.js, TypeScript, PostgreSQL, OpenAI API

- Developed an AI-powered platform integrating OpenAI API with a Python-influenced backend architecture for personalized content generation.
- Engineered PostgreSQL database schema and optimized REST API endpoints for scalable user progress tracking.

TechVerse | [Live Demo](#) | [GitHub](#)

HTML, CSS, JavaScript, TypeScript

- Built a scalable job tracking system processing data for 250+ companies with location-based search and tech stack filtering.
- Implemented automated shortage alerts and offline caching mechanisms ensuring uninterrupted data access.

Agentic RAG Assistant | [GitHub](#)

Next.js 14, FastAPI, Python, Supabase PostgreSQL, pgvector, Google Gemini

- Developed a full-stack Retrieval-Augmented Generation (RAG) application that enables users to upload PDF/DOCX documents and interact with their content through AI-powered conversational search.
- Built a document ingestion and semantic retrieval pipeline using Gemini embeddings, Supabase PostgreSQL with pgvector, and FastAPI, with Google Gemini for context-aware response generation.

HireNova | [GitHub](#)

HTML, CSS, JavaScript

- Engineered a recruitment web application streamlining hiring workflows via structured RESTful data management.
- Designed intuitive navigation and scalable frontend architecture for efficient talent acquisition.

Internships & Certifications

Application Development Intern — Codec Technologies Pvt. Ltd. (June – Aug 2026)

- Engineered scalable application features using Python and automated cloud deployment workflows.

Artificial Intelligence Intern — Samsung Innovation Campus (Jul – Oct 2025)

- Implemented machine learning models and AI solutions utilizing Python. (ID: SIC08063)

Android App Development Intern — Tech Guide (Oct – Nov 2025)

- Developed and optimized mobile application features applying software engineering principles.

Web Development Intern — National Intern (Dec 2024)

- Built responsive web interfaces using HTML, CSS, and JavaScript with top-tier performance.

Education

Bachelor of Technology in Computer Science & Engineering

Institute of Technology and Management (ITM), GIDA — Final Year
